

Travellers Rest Public Consultation

You are invited to participate in an online public consultation regarding plans to develop the former Travellers Rest public house site, on the A38 Gloucester Road, Patchway into new affordable housing.

The consultation is hosted by Black Box Planning on behalf of Bromford Housing.

Bromford Housing are one of the UK's leading registered providers of affordable housing, with almost 45,000 homes across central and south west England. As well as managing affordable homes for those who need them, they also develop new affordable homes for rent or purchase.

The proposal at Travellers Rest will deliver 27 affordable 1-bed and 2-bed flats available for rent for local people in housing need as determined by South Gloucestershire Council. The local planning authority holds records of numbers of households in housing need and there is significantly high need for 1 and 2 bed properties in both Patchway and Bradley Stoke wards.

The proposal will involve the demolition of the former public house building and a new building constructed to reflect the existing relationship to the A38. A new amenity space and car park will be provided for residents.

We welcome any feedback, questions or suggestions that you may have.

The best way to submit comments is through our consultation webpage by **Friday 22nd April 2022**.
