

Cluster Training

Cluster 2 are working with South Glos Parent Carers this year and part of what they are offering is training for parents and staff. The first two online sessions are now available to book on eventbrite. Please send these links out to staff and families in your schools.

The sessions are online through zoom, the main presentation will be recorded and available for 7 days (you need to sign up to get the recording). Following the presentation there will be a question and answer session (which will not be recorded for privacy). These sessions are designed for parents early in their journey who may not be thinking about a diagnosis at this stage but are equally relevant for those further along who may already have diagnosis.
